Company Profile

Imagescape Design Studios provides an integrated design process with master planning, architecture, landscape and interiors carried out in house. This ensures each facet of the design is coordinated, complementary and provide the client with a single point of contact.

Christine Kelly (Principal) brings over 25 years experience with the aged care sector to the Aged Care Studio. Her strength lies in the ability to consolidate a project brief after listening to stakeholders. Her practical approach to design has resulted in many successful projects.

Philosophy

At Imagescape Design Studios we recognise that in order to understand the client's needs and desire to achieve a suitable design solution we must understand the client and where they are coming from.

We believe in providing a complete solution that addresses the wider ramifications of responsible use of the resources of our planet. Integral to this is the provision of a design that is an asset to the community in the long term and a design that provides ongoing joy to the community.

The studio is committed to using the latest technology including Building Information Modelling (BIM). This provides realistic 3 dimensional visual of the design to assist in client briefing and communicating the project to end users.
